

Afeez Awofeso

London, United Kingdom | opemipoawofeso@gmail.com | linkedin.com/in/afeez-awofeso-662665324

EDUCATION

University of Greenwich – London, UK

June 2026

BEng (Hons) Computer Engineering | Predicted: First Class Honours

Relevant Modules: Web Systems Engineering, Sensors and Networks, Embedded Systems, Mobile App Development, Python Programming

PROJECTS

Dishcovery – AI Restaurant Discovery Web App

2026

Technologies: Python, Flask, JavaScript, Google Places API, TF-IDF, Cosine Similarity

- Built a full-stack restaurant finder applying TF-IDF and cosine similarity to deliver personalised recommendations based on user search input
- Integrated Google Places API for live restaurant data, filtering and location-aware results
- Designed end-to-end from data pipeline to front-end UI, demonstrating applied ML in a real-world web context

Dover Rover – Remote Controlled Rover System

2026

Technologies: Raspberry Pi, Arduino UNO, Python, Flask, HTML, CSS, JavaScript

- Contributed to system integration and testing for an autonomous rover with ultrasonic sensors, motor control and real-time web dashboard telemetry
- Diagnosed and resolved sensor and hardware issues, improving system reliability; documented findings for the team

Patient Observation System

2026

Technologies: Flask, SQLAlchemy, Python

- Developed a secure web application for recording and managing patient observations, with role-based authentication and a real-time staff dashboard
- Implemented database schema with SQLAlchemy supporting full CRUD operations for patient records

Battleship Web Game

2026

Technologies: HTML, CSS, JavaScript, Local Storage

- Developed an interactive browser-based Battleship game with responsive UI and game-state management
- Implemented ship placement logic, turn-based gameplay and win-condition detection using JavaScript
- Used local storage to preserve player progress and improve user experience.

PROFESSIONAL EXPERIENCE

Claridge's Hotel – London, UK – Team Leader

Dec 2022 - Present

- Lead and coordinate teams in a fast-paced, high-standards hospitality environment
- Developed strong communication, leadership and problem-solving skills directly transferable to engineering team settings

Lektaw Ventures – IT Support Technician

Feb 2024 - Sep 2024

- Provided technical support for hardware, software and network-related issues
- Collaborated with the IT team to maintain system performance, documented recurring issues and contributed to process improvements

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, JavaScript, Kotlin, C, Bash, HTML, CSS

Frameworks & Tools: Flask, Django, SQLAlchemy, Android Studio, Git/GitHub, Linux, MATLAB, VS Code

Technical Areas: Full-stack development, REST APIs, ML recommendation systems, IoT, embedded systems, Arduino

Software Practice: Version control, unit testing, debugging, technical documentation, team collaboration

EXTRACURRICULARS

- Personal GitHub portfolio of self-initiated software and IoT projects: github.com/LordPizle
- Actively developing skills in machine learning and AI through independent projects
